WFIF 1500 AM
Life Changing Radio

Dear, Phil

Thank you for sending in your DX report for the following:

DATE: 3/24/95 TIME: 7:51-8 AM

Enclosed with this letter are a coverage map and other information about WFIF. We appreciate the time and effort of hobbyists like yourself, who seek out signals of distant AM stations. This is especially thrilling when you are able to "catch" a DAYTIMER, like ours! We encourage you to let others know about the station, and see how many others can pick us up from under WTOP's 50,000 watt signal.

Thank you and 73!

My apologies for being so late returning this - been very busy with other duties. Your report was detailed and accurate. Enclosed are plans to build a useful DX tool. Thanks for your patience!
